Action Plan – East Alabama Rural Planning Organization

Goal 1 – Understand the region’s needs that are not being met by the state’s Transportation Improvement Program.

Objective 1.1 – Conduct a needs assessment of some sort in order to determine what needs are not being met by the state’s TIP. In Kentucky, a Project Identification File was produced, in which photographs of specific roadways that needed improvement were retained and prioritized using the vision, goals, and objectives. This type of file should be established at the EARPO through the needs assessment and through independent research.

Objective 1.2 – Create a prioritized list of these projects that can be given to ALDoT.

Goal 2 – Create a vision statement relating to transportation for the region and establish goals and objectives to achieve that vision.

Objective 2.1 – Gather member governments, local officials, citizens, and interested agencies and organizations together to discuss what they want for the region.

Objective 2.2 – From this discussion, create a vision statement and establish goals and objectives to achieve that vision.

Goal 3 – Understand rural transit’s role and effectiveness in the region.

Objective 3.1 – Conduct a study of the rural transit systems to determine who utilizes them, where those people go, what needs are being met, and what needs are not being met.

Objective 3.2 – Determine ways in which rural transit could be improved and people’s needs could be better met.

Goal 4 – Generate more public involvement.

Objective 4.1 – Create a public involvement plan for the region.

Objective 4.2 – Utilize innovative and interactive practices like design charrettes, community visioning workshops, and scenario planning to create excitement for planning and provide for hands-on experiences. Encourage local officials to do the same.

Objective 4.3 – Utilize technologies to disperse information and to collect information. Keep an updated website and utilize online surveys (in addition to more traditional techniques) when public involvement is needed. Publish all important documents on the website.

Goal 5 – Consider long-range transportation in the region.

Objective 5.1 – Consider the creation of a comprehensive long-range transportation plan for the region and determine feasibility and effectiveness.

Objective 5.2 – If a long-range transportation plan is not desirable, establish long-range transportation goals for the region.

Goal 6 – Promote good practices in transportation planning throughout the region, specifically related to multi-modal transportation.

Objective 6.1 – Aid local officials and agencies in better understanding connections of land use and transportation.

Objective 6.2 – Encourage and engage in transit planning.

Objective 6.3 – Promote bicycle and pedestrian facilities projects.

Upcoming Funding Opportunities & Deadlines

It's not too early to be thinking ahead!

- Industrial Access Road and Bridge Program (ALDOT) – **late January** deadline possible
- FY 2019 EPA Brownfields Grant – for FY19 a total of \$50 million is expected to be awarded to more than 100 recipients. Proposal deadline is **January 31, 2019**
- National Endowment for the Arts (NEA) is accepting applications through **February 14, 2019** for its Art Works Grant Program. NEA encourages applications for artistically excellent projects that address many activities. More information can be found here: <https://www.arts.gov/grants-organizations/art-works/grant-program-description>. Matching grants will range from \$10,000 - \$100,000.
- The EPA **Environmental Justice Small Grants (EJSG) Program** provides funding directly to community-based organizations for projects that help residents of underserved communities understand and address local environmental and public health issues. Applications are due **February 15, 2019**.
- The Institute of Museum and Library Services has launched a new special initiative, Accelerating Promising Practices for Small Libraries (APP) and is accepting grant applications through **February**

25, 2019. This opportunity is designed to strengthen the ability of small and rural libraries, archives, and related organizations to serve their communities. Award sizes range from \$10,000 to \$50,000.

- The USDA **ReConnect** program will offer up to \$600 million nationwide in loans and grants to help build broadband infrastructure in rural areas. Projects funded through this initiative must serve communities with fewer than 20,000 people that have no broadband service or where existing service is slower than 10 megabits per second (Mbps) download and 1 Mbps upload. To qualify, projects must increase access speeds to at least 25 Mbps upload and 3 Mbps download. Priority will be given to projects that propose to deliver higher-capacity connections to rural homes, businesses, and farms. Applications for grant funding are due by **April 29, 2019**, for loan and grant funding by **May 29, 2019**, and for loan funding by **June 28, 2019**.

More information on deadlines will be distributed as it becomes available.
